Increase of Army Strength-Coast Defence. WASHINGTON, November 11.-In trans-

mitting to the Secretary of War the annual reports of the department commanders, in connection with his own reports upon the military operations of the past year, General Nelson A. Miles, command-

ing the army, says:
"Fortunately during the year the army was called on only to a limited extent to act either against hostile Indians or against bodies of men who were engaged against bodies of then who were ranged in violating the United States laws of international treaty obligations. The troops of the Mexican republic, as well as our own, have been engaged in suppressing such acts of lawlessness as have in a small degree interfered with the peace of communities on both sides of the borders and arrangements have been made or communities on both sides of the dor-der, and arrangements have been made through the Government of Mexico to se-cure co-operation of the forces of that re-public and our own to this end."

He commends the discipline and personnel of the army. During the past year the country has fortunately been free from any serious outbreak of Indians. The different tribes have shown themselves well disposed, and are making some progress towards civilization. towards civilization.

towards civilization.

A review of the various changes in the strength of the army shows that a third of a century ago, when the population of the country was only half of what it is to-day, and the value of property much less, the army numbered twice as many men as it does to-day, and has remained crystallized for twenty. men as it does to-day, and has remained stagnant and crystallized for twenty years. General Miles recommends that the enlisted strength of the army be fixed at one soldier to every 2.00 of population as a minimum, the maximum not to exceed one soldier for every 1,000 of population, "the strength to be determined by the President of the United States, according to the processities and requirements of ing to the necessities and requirements of

A consideration of the importance of coast defence comprises the greater part of General Miles's report, and is the subject of his most important suggestions.

He renews the recommendations made in his report for last year, and adds:
"Liberal appropriations should be made for the manufacture of high-power suns and mortars, the construction of emplacements, platforms, and fortifications for the same, and the construction of barracks and quarters for the accommodation of the artillery garrisons that are to command them; and I urge that a sufficient appropriation be made available for the work of the ordnance, engineer, and quartermaster's departavailable for the work of the ordnance, engineer, and quartermaster's departments during the coming year, as follows: At Portland, Me., \$1,124,550, Portsmouth, N. The Strict Rules Applicable to the Duke of Orleans's Wedding. (The Tribune.)

BARRED FROM COURT.

Although the Italian nobility enjoys a reputation for impecuniosity, it may be questioned whether it is not surpassed in this respect by, that of France. Since the abolition of the laws of primogeni the aboution of the laws of primogeni-ture and entail at the time of the Revo-lution, 100 years ego, and the enactment of the statutes which provide that chil-dren shall share alike in the parental in-heritance, the possessions of the aris-tocracy have been gradually decreasing, each heir being in turn obliged to divide up his property among his children at his death. The only means that the nobles have had of arresting and coun-

most among these rules and regulations is one which has the effect of barring from admission to court all ladies who cannot thow that for several generations back show that for several generations back their maternal, as well as paternal, ancestors have been guilty of no measiliance, and have mated only with persons possessed of a blood as blue as their own. The same rule applies to men, except when they are layestigated with some office or dignity which lose facto renders them what is known in court phraseology as "Hoffahlg," that is to say, "presentable at court," less strictness, however, being observed with regard to the qualieing observed with regard to the quali being observed with regard to the quan-fications of men than in connection with those of women. Presentation at the Court of Vienna is, under the circum-stances esteemed in Europe as a figher honor and greater privilege than that at any other court of the Old World.

BEGGING FOR INVITATIONS. Naturally, as soon as ever it became known in France that the wedding was to take place at Vienna, the Duke of Orleans and his relatives were overhad ever contributed a cent toward the Royalist cause, or who had offered the slightest hospitality to any member of the House of Orleans, deemed themselves milled to largitages. the House of Orleans, deemed themselves entitled to invitations, and hoped thus to have the opportunity of penetrating the hitherto closed portals of the Court of Vionna in the wake of the Duke of Orleans, and, figuratively speaking, hanging to his coat-tails. Emperor Francis Jeseph has, however, no intention of permitting the wedding to degenerate into a mere demonstration of French Royalists against the government of the republic, with which he wishes to remain on terms of friendship; and he at once informed the Duke of Orleans that, with the view of preventing the Court of Vienna from being made the scene of anything that could be interpreted at Paris as a monarchical manifestation, he of anything that could be interpreted at Paris as a monarchical manifestation, he would be obliged to rigidly enforce the rules and regulations with regard to admission to court in the case of all foreign guests, save those who happened to constitute the household of the bridegroom. This has been communicated to the Royalists in France by the Duke, through the means of the "Gaubiois" and other monarchical organs of the French press, with the result that there is much wailing and gnashing of teeth among those who have hitherto styled themselves adherents of the Preender.

The Duke, however, has to make up The Duke, however, has to make up for their elimination from the festivities at court by arranging for a species of reeption which he will give himself, either

in Austria or at Brussels, and at which all his friends and adherents will be accorded the honor of presentation to the Archduchess and e permitted to pay to her that homage which would be hers by right were she really Queen of France. But it will be but a makeshift at the best, and the project appears in no sense to allay the bitterness which has been caused throughout French monarchical society by the attitude of Emperor Manage Losenh. SOME OF THE UNFORTUNATES.

Among these thus barred by reason of bourgeois blood derived from their immediate ancestors is, first and foremost, the Due de Brissac. True, the name which he bears is one of the most illustrious in French history, and it is a De Brissac of the Middle Ages to whom the French are indebted for the fact that the French are indebted for the fact that the French are under the substituted for Latin in all of the Middle Ages to whom the French are indebted for the fact that the French language was substituted for Latin in all legal procedure. He Had Married Only Last Monday Evening.

AUSTIN, TEX., November 11.-Frank Hamilton, for years a prominent banker here, took morphine this afternoon with suicidal intent, and died this evening. Up to a few months ago he was a member of to a few months ago he was a memoer of Raymond & Co." banking house, and he is well known to New York bankers. He took an active part in the construction of the Austin dam, in which he lost much money. He was married Monday night to a Miss Carrie Gray, of this city, his first wife having died two years ago. Despondency over losses is supposed to have led to the act.
